

CENTRAL INSTITUTE FOR CONSERVATION, BELGRADE
SCIENTIFIC ASSOCIATION FOR THE DEVELOPMENT
AND PROMOTION OF NEW TECHNOLOGIES

Dear students, professors and colleagues,

It is our great pleasure to invite you to the First International Student Scientific Conference "Multidisciplinary Approach to Contemporary Research" to be held on 25 and 26 November 2017 in the premises of the Central Institute for Conservation, Terazije 26, Belgrade.

Scientific Conference is organized by "Scientific Association for the development and promotion of new technologies" and "Central Institute for Conservation" from Belgrade. The aim and idea of the Conference is to make science and scientific way of thinking and working closer to students, as they will be able, in the future, when they are employed, to connect science and economy. For this reason, the right to participate have only undergraduate and master students, who will, with help and monitoring by their teachers and/or colleagues, write and prepare papers and presentations, and present them by themselves.

We invite all teachers to respond to the call in large numbers and help the realization of this event.

Registration fees are provided by the organizer.

Conference covers the following topics: mechanical engineering, electrical engineering, civil engineering, architecture, heritology, economics, traffic and transportation, and other sciences from the aspect of research.

The program consists of oral and poster presentations.

The official languages are Serbian and English.

The official web site is: <http://macs.cik.org.rs/>

It would be our pleasure to welcome you at the Conference, please send your enrolment forms, UNTIL 5th of November 2017. to the following email address:

sanjapetronic@yahoo.com or apiona96@gmail.com

Sincerely,
Organizing Committee
