

ENGELSBERG

SUMMER SCHOOL IN CLASSICAL ARCHITECTURE

From July 2nd to 30th

Visit our website to apply
<http://engelsberg.intbau.org>

PROGRAMME

- Lectures on the classical architectural Orders and other classical architectural vocabulary; their history, mythology, details, and application in design.
- Students will be taught about the conventions of classical composition in architecture, as well as the different ways of using and adapting them and their details.
- Visiting speakers will deliver talks and encourage debate on controversial subjects associated with classical architecture such as modernity, technology, and symbolism.
- Lectures in hands-on skills, measured and freehand drawing, three-dimensional modelling and hand-drawn architectural draughtsmanship.
- Two design projects: one theoretical and one based on real sites in the area that will be visited during the course.
- Four days of the course will be spent in Stockholm, where students will get to know the city and its highly influential early twentieth century classical architecture, known as 'Swedish Grace'.

The Engelsberg Summer School in Classical Architecture is a four-week intensive programme taught by leading practitioners and academics of modern classical architecture.

The course takes place at the Engelsberg Ironworks, situated in a wooded rural setting, in the mining area of Norberg in central Sweden, just two hours north of Stockholm.

Meals and accommodation are included in the tuition fee. Each student will have their own bedroom in one of the Engelsberg buildings.

INFO

- 4 weeks intensive course
- 890 € tuition fee
- Accommodation, meals and material provided

APPLICATION REQUIREMENTS

- Application form
- Cover letter
- Drawings (up to 5 examples of your previous works in architecture, art class or else demonstrating hand-drawing skills)
- Two relevant references
